

DEVELOPMENT OF ADMINISTRATIVE RULES

The Board of Education shall delegate to the Superintendent of Schools the function of specifying required actions and designing the detailed arrangements under which the schools will be operated. These rules and detailed arrangements shall constitute the administrative rules governing the schools. Administrative rules shall be consistent with Board policy and state and federal requirements.

The Board itself shall formulate and adopt administrative rules only when specific laws, strong community attitudes or probable staff reaction requires them to do so, or when otherwise requested by the administration.
