

SALE OF SUPPLIES TO STUDENTS

On occasion it may be necessary for the district to purchase items intended for resale to students. These purchases should be restricted to items that will be used by the students at school, or for school sponsored activities. This practice may be necessary when items need to meet a specific or custom specification (e.g. PE uniform, locks, calculator) or items that are more particularly ordered in bulk (lumber, computer disks, food component). Transactions will take place through the school's student activity account.
